

NEW Lawns Need More Than Just Water!

Seasol Lawn & Turf Starter is the latest addition to the Seasol Lawn Care range. It's natural, dynamic combination of a higher concentrate of **Seasol PLUS** liquid compost, makes it ideal for establishing lawn seed and turf in one easy hose-application.

SEASOL LAWN & TURF STARTER HELPS CREATE A SUCCESSFUL START TO ANY LAWN.

- ✓ For lawn seed, it helps improve germination.
- ✓ For lawn turf, it helps reduce transplant shock, giving it a kick-start to life.
- ✓ For any new lawn, it stimulates strong root development, healthy vigorous growth and reduces stress from heat, drought and frost.

Seasol Lawn & Turf Starter is boosted with highly active liquid compost which improves soil health, moisture retention and nutrient uptake to promote healthy, strong lawns.

Simply attach it to your hose and water it in as soon as the seed has been scattered or the turf has been laid. Then apply it weekly for the first six to eight weeks of establishment. Always ensure you water your growing lawn every day, more so on days of higher temperatures.

Once lawns have established, apply **Seasol for Lush Green Lawns** or **Seasol for Buffalo Lawns** every 2 to 4 weeks during the growing season to feed and revitalise your lawn and soil.

Available from Bunnings in a 2 litre hose-on Twin pack for \$17.48. Each 2 litre hose-on pack will treat up to 100 square metres of lawn.
