

# FOR BIGGER, BRIGHTER, MORE BEAUTIFUL BLOOMS!

**PowerFeed PRO SERIES Plant Food Roses & Flowers** helps to make your garden bloom!

It's everything your garden needs for higher yields of longer lasting colourful roses and flowers.

**PowerFeed PRO SERIES Plant Food Roses & Flowers** is a premium fertiliser and soil improver boosted with fish, seaweed and liquid compost.

The premium blend of nutrients, trace elements and amino acids helps to promote healthy growth without producing excessive foliage. It contains extra iron to help reduce leaf yellowing, promoting healthy budding and flowering. **NPK: 7.0%:2.0%:8.0%**

Boosted with added seaweed, it helps improve the root system and reduces stress from heat, drought, and frost. It also helps with pests and diseases such as aphids, black spot and powdery mildew.

The extra soil improver\* (liquid compost) conditions the soil, by improving soil health and plant nutrient uptake by hungry roses and flowering plants.

For a general application apply 50mL of concentrate per 9 litres of water (standard watering can) every 1-2 weeks during the growing and flowering season. It is a fast acting liquid which goes to work immediately whether applied to the soil or foliage.

Note: It's not recommended to be applied on days that may exceed 25 degrees.

**PowerFeed PRO SERIES Plant Food Roses & Flowers** 1.2 litres is available from Bunnings for \$13.85.
