

Product Analysis

Product

Seasol Organic* Iron for Deep Green Lawns

Technical Analysis

Composition	Amount	Units
pH	10.5	Units
Total Solids	25%	% w/v
Specific Gravity	1.15	
Appearance	Brown coloured liquid with a characteristic colour	
Filtration	150 microns	
Total Organic Matter	11.21%	

Element	Amount	Units
Nitrogen (N)	1.14%	% w/v
Phosphorus (P)	0.02%	% w/v
Potassium (K)	0.53%	% w/v
Boron (B)	20.1	mg/L
Calcium (Ca)	263	mg/L
Cobalt (Co)	1.62	mg/L
Copper (Cu)	1.45	mg/L
Iron (Fe)	26,800	mg/L
Magnesium (Mg)	3,410	mg/L
Manganese (Mn)	125	mg/L
Molybdenum (Mo)	1.22	mg/L
Sodium (Na)	697	mg/L
Sulphur (S)	1,7300	mg/L
Zinc (Zn)	46	mg/L

Product Information

Seasol Organic* Iron for Deep Green Lawns is manufactured in Australia by Seasol International (a division of DuluxGroup). The chemical analysis is compiled from samples analysed by accredited Australian laboratories. The above analytical data is a typical average across different production batches, the concentrations of individual components may vary from batch to batch.
