

PRODUCT INFORMATION

Seasol Advanced Potting Mix

Seasol Advanced Potting Mix is a premium potting mix for all potted plants except phosphorus sensitive natives. It has everything in the bag to take the guesswork out of growing and looking after potted plants.

INSTRUCTIONS FOR USE

Planting

Seasol Advanced Potting Mix is red tick certified to meet the Australian Standards for a premium potting mix. It contains enough fertiliser for up to 6 months of healthy plant establishment, depending on plant variety.

It's easy to use. Follow these simple steps for best results:

1. Before planting, fill a bucket or container with water and **Seasol**, submerge the plant to be repotted to soil level until bubbles stop, then let drain.
2. Partially fill new pot with potting mix. Avoid blocking drainage holes with rocks as this will prevent correct drainage. **Seasol Advanced Potting Mix** drains freely.
3. Squeeze soaked pot gently before removing the plant. Turn upside down and hold the soil in place with outstretched hands. Lightly tap the rim of the pot on a hard surface to free the plant. Avoid loosening and breaking up the root system.
4. Place plant in pot and backfill potting mix so existing soil level of plant is approximately 25mm below rim of pot. Press potting mix gently around the plant.
5. Water in gently with **Seasol** and let drain. Place potted plant in final position. Lift pots up off the ground, with pot feet to avoid plants sitting in water-filled saucers.

Repotting

Check the plant and potting mix throughout the seasons and if the plant becomes pot bound, repot into a larger pot following the planting instructions above.

Ongoing Plant Care

Check potting mix weekly (or daily in high heat) for moisture content and water when needed. Depending on plant variety, apply **Seasol** and **PowerFeed** every 2 to 4 weeks for continual healthy growth.

Seasol Advanced Potting Mix is available from Bunnings in a 25 litre bag for every gardener's needs.

Treated with **Seasol GOLD** to reduce transplant shock and aid plant establishment

Balanced nutrient and trace element mix for lush foliage, vibrant blooms and tasty edible produce

Improves plant health to help reduce stress from pot life including pests, disease, heat and frost

Rich in organic matter and compost *plus* a wetting agent to improve plant development and ensure water gets to where it's needed

USAGE TIPS

Seasol Advanced Potting Mix is the perfect partner for any potted plant outdoors or indoors. For indoor plants, **Seasol Indoor Potting Mix** is ideal.

- ✓ Check potting mix around plants and top up when needed. To rejuvenate potting mix, add **Seasol Potting Mix Booster** into the mix and water it in thoroughly to get those microbes working.
- ✓ During summer, check moisture in pots daily and water when needed.
- ✓ On days of high heat move pot plants to a shady area such as under a tree or verandah.
- ✓ During winter, protect plants from frost by moving pots to a warm, sheltered position.
- ✓ For plants that require sun each day, such as vegies, move the pot around the garden to catch it.
