

PRODUCT INFORMATION

Seasol Foliar Spray

Seasol Foliar Spray is a convenient 750mL trigger pack designed for patios, courtyards, balconies and all potted plants.

This unique foliage formula combines the plant-energising benefits of **Seasol the Seaweed Solution** with a specially formulated nutrient mix and trace elements, plus organic chelators, for fast foliage uptake.

INSTRUCTIONS FOR USE

Seasol Foliar Spray 750mL trigger pack is a fast-acting liquid that goes to work immediately when applied to the foliage.

Seasol Foliar Spray contains **Seasol** to stimulate strong root growth and helps plants cope with all kinds of stress, such as heat, drought, low light, pests and disease. The balanced source of nutrients and trace elements help boost vigorous, healthy growth and stimulate flowering and fruiting.

APPLICATION DIRECTIONS

Ready-to-use

Regular applications, every 2 to 4 weeks, will give the best results. It is safe on all pots and plants, including natives, vegies, and flowering plants, at any time of the year.

Application is easy as it's already mixed in the container. Generally, apply by spraying the foliage of the plant. For best results, if the plant is indoors, take it outside for some fresh air and spray the foliage before taking it back inside.

If using indoors, take care when spraying close to decor or flowers on the plant as it may stain.

PLEASE NOTE: Any liquid applied to foliage in direct sunlight can cause burning. Avoid use on plants when they are in direct sunlight, particularly if magnified through a window.

Do not use **Seasol Foliar Spray** outdoors if daytime temperature is expected to exceed 25°C.

Seasol Foliar spray is available from Bunnings in a 750mL trigger spray to meet every gardener's needs.

Promotes flowering and fruiting and enhances colour in foliage and blooms

Helps plants to cope with all kinds of stress, including heat, drought, frost and low light

Neutralised odour for indoor use for lush, healthy foliage

USAGE TIPS

Seasol Foliar Spray is ready to use as the perfect partner for any pot or plant project applied regularly throughout the year.

- ✓ In summer apply early morning or evening before the heat of the day, as it may burn the foliage.
- ✓ In cooler weather apply to the foliage once the temperature increases to give the foliage time to dry before nightfall. This helps to prevent fungal diseases.
- ✓ Ideal to use on hanging baskets as the baskets don't need to be moved to apply it. Simply spray it on the foliage.
- ✓ Ensure to check on potting mix soil moisture every day and twice daily during high heat. Water as needed.
- ✓ Due to the natural ingredients in the product avoid contact with porous surfaces. If contact is made, please wash off immediately with water.
