

PRODUCT INFORMATION

Seasol Indoor Potting Mix

Seasol Indoor Potting Mix is a premium potting mix specially formulated for all indoor potted and house plants. It has everything in the bag to take the guesswork out of growing and looking after indoor potted plants.

INSTRUCTIONS FOR USE

Planting

Seasol Indoor Potting Mix is red tick certified to meet the Australian Standards for a premium potting mix. Everything required for the first 6 to 8 weeks of planting is contained in the bag. It is safe to use in all pots with all indoor and house plants including Peace Lilies, Monstera, Dracena, Fiddle Leaf Figs, Devil's Ivy, ferns and palms. *Not suitable for hydroponics.*

It's easy to use. Follow these simple steps for best results:

1. Before planting, fill a bucket or container with water and **Seasol**, submerge the plant to be repotted to soil level until bubbles stop, then let drain.
2. Choose a pot with drainage holes or a separate water reservoir. Partially fill the pot with potting mix.
3. Squeeze pot gently before removing the plant from the pot. Loosening and breaking up the root system is not required with small indoor plants.
4. Place plant in pot and backfill potting mix so existing soil level of plant is approximately 25mm below rim of pot. Press potting mix gently around the plant.
5. Water in gently with **Seasol** and let drain. Place plants in a well-lit position or follow the directions on the plant tag.

Repotting

Check the plant and potting mix throughout the seasons and if the plant becomes pot bound, repot into a larger pot following the planting instructions above.

Ongoing Plant Care

Apply **PowerFeed Indoor & Potted Plants trigger spray** around the soil to boost plant growth and reduce the resistance to pest and disease attack. Place the potted plant in a cover pot or saucer, before watering remove the plant pot from the cover pot or saucer, as you do not want any water collecting in the bottom.

Check for pests and control them with **EarthCare White Oil insect spray**. This also adds a nice leaf shine.

Treated with **Seasol GOLD** to reduce transplant shock and promote healthy growth

Balanced nutrient and trace element mix for lush vibrant foliage and beautiful blooms

Improves plant health to help indoor plant stresses including pests, disease, heat, cold and low light

Rich in organic matter and compost *plus* a wetting agent to improve plant development and ensure water gets to where it's needed

USAGE TIPS

Seasol Indoor Potting Mix is the perfect partner for any indoor or potted house plants. However for specific outdoor potted plants, use **Seasol Advanced Potting Mix**.

- ✓ Check potting mix and top up when needed. To rejuvenate potting mix, add **Seasol Potting Mix Booster** into the mix and water it in thoroughly.
- ✓ During summer, check moisture in pots daily and water when needed. Only water when the soil feels dry. Test the soil by putting your finger down into it.
- ✓ During winter, check soil moisture weekly and only water as needed. Indoor plants require less water at this time of the year.
- ✓ Move plants around your home depending on the season. They require more light and warmth in winter and away from direct light and heat in summer.

Seasol Indoor Potting Mix is available from Bunnings in a 10 litre bag for every gardener's needs.
