

PRODUCT INFORMATION

Seasol Lawn Top Dress Mix

Seasol Lawn Top Dress Mix is specially formulated to revitalise soils for healthy, lush, green lawns. It contains everything you need to help take the guesswork out of helping a stressed lawn recover, improving dead patches and saving water.

INSTRUCTIONS FOR USE

Seasol Lawn Top Dress Mix is safe to use on all lawns including Buffalo lawns. Easy to use, it contains the highest quality raw ingredients, **Seasol GOLD**, balanced nutrients and trace elements and a wetting agent to boost overall lawn health.

Seasol Lawn Top Dress Mix can be used on established lawns, when laying lawn turf or sowing lawn seed. It is red tick certified to meet the Australian premium standards for a premium mix.

Maintaining and aerating an established lawn

Simply, follow these simple steps:

1. Aerating lawns in spring and autumn allows oxygen, water and nutrients into the soil.
2. To aerate small lawn areas, use a fork thrusting it deep within the soil and moving it gently backwards and forwards. Move across the lawn spacing holes about 10-15cm apart.
3. For larger areas, hire an aerator from an equipment hire or hardware centre.
4. Once the soil is aerated, spread **Seasol Lawn Top Dress Mix** over the lawn and water it in thoroughly after application.

Lawn repair, sowing lawn seed or laying lawn turf

Simply, follow these simple steps:

1. Before sowing seed or laying turf, prepare the soil by removing weeds and debris.
2. Lay **Seasol Lawn Top Dress Mix** to a depth of 50mm thick over the soil surface and dig it into a depth of 200mm.
3. Sow lawn seed or lay down turf by following the manufacturers directions.
4. Water with **Seasol Lawn + Turf Starter** weekly for the first six weeks to help improve lawn seed germination and reduce transplant shock on newly laid lawn turf.

Treated with **Seasol GOLD** to boost overall lawn health and aid rapid recovery

Slow-release feeding with balanced nutrients and trace elements for a strong, healthy lawn without burning

Boosted with iron to help promote greener lawns

An added wetting agent helps water get to where the lawn needs it, in the root system

USAGE TIPS

Seasol Lawn Top Dress Mix is the perfect partner for any lawn project applied throughout the year.

- ✓ Apply **Seasol Lawn Top Dress Mix** during summer to improve the soil's water holding capacity during periods of high heat
- ✓ Reapply it in winter to help rejuvenate soil health ready to burst into spring growth.
- ✓ Ensure water is going into the lawn. If it is pooling on top or running off, it may be repelling water. Apply **Seasol Super Soil Wetter & Conditioner** to help get water to the lawn's roots.
- ✓ Establish a regular deep watering regimen to help the lawn's roots go into the soil for water and nutrients.
- ✓ Mow lawns regularly throughout the growing season for a strong, lush green lawn.

Seasol Lawn Top Dress Mix is available from Bunnings in a 25 litre bag for every gardener's needs.
