

PRODUCT INFORMATION

Seasol Lawn & Turf Starter

Seasol Lawn & Turf Starter is a superior health treatment and root booster for newly laid lawn seed and lawn turf.

INSTRUCTIONS FOR USE

Seasol Lawn & Turf Starter has all the benefits of a higher concentration of **Seasol** plus liquid compost to help improve lawn seed germination and reduce transplant shock on newly laid lawn turf.

It promotes strong root development and healthy green growth and reduces stress from heat, drought, frost and foot traffic.

Boosted with highly active liquid compost, **Seasol Lawn & Turf Starter** helps to improve soil health, moisture retention and nutrient uptake.

APPLICATION DIRECTIONS

Seasol Lawn & Turf Starter hose-on pack is ready to use. Apply it to newly sown seed or newly laid turf every week for the first six weeks.

For established lawns use **Seasol for Lush Green Lawns** or **Seasol for Buffalo Lawns**. Both products are safe for all types of lawns including buffalo. Apply every fortnight to month during the growing season for a lush, healthy green lawn.

Hose-On

To use, simply shake the container and push the plastic straw included in the pack firmly into the underside of the spray nozzle. Remove the cap and attach the spray nozzle. Attach to the hose, turn on the tap, lift the yellow tab and spray onto the lawn foliage or soil.

Each 2 litre hose-on pack will treat up to 100m² of lawn or soil within 10 minutes (adjust timing and volume by increasing or decreasing the water pressure).

Watering can application

Seasol Lawn & Turf Starter hose-on solution can be diluted for a watering can application at a rate of 80mL of solution per 9 litres of water.

Seasol Lawn & Turf Starter is available from Bunnings in a 2 litre hose-on twin pack to meet every gardener's needs.

Safe on all lawn turf, it helps reduce transplant shock and aids lawn establishment

Promotes strong root development & healthy green growth

A fast-acting liquid, it helps reduce stress from heat, drought & foot traffic

USAGE TIPS

Seasol Lawn & Turf Starter is the perfect partner for sowing lawn seed or laying lawn turf.

- ✓ Prepare the soil before sowing lawn seed or laying lawn turf. Add organic matter and/or **Seasol Super Compost** and ensure the soil is level.
- ✓ Apply **Seasol Lawn & Turf Starter** straight after sowing seed or laying turf. Keep the lawn or seed moist but not wet. Increase watering during high heat.
- ✓ Apply it in the cool of the day, early morning or late evening. If water is pooling or running off apply a soil wetter such as **Seasol Super Soil Wetter & Conditioner**.
- ✓ After six weeks your lawn will be hungry and need a feed. Apply **Seasol for Lush Green Lawns** for healthy strong growth.
