

PRODUCT INFORMATION

Seasol Super Compost

Seasol Super Compost is a premium compost mix, specially formulated to revitalise soils for healthy plant growth. It takes the guesswork out of rejuvenating soils and boosting plant growth for the best garden in the street.

Safe for all soils and plants (excluding phosphorous sensitive natives).

INSTRUCTIONS FOR USE

Seasol Super Compost is red tick certified to meet the Australian premium standards for a premium mix. It does not require any additional fertilisers or nutrients. Everything required for plant growth is in the bag.

Application to new and existing garden beds

For best results, follow these simple steps:

1. Existing garden areas apply at a depth of up to 5cm and dig in where new plants are being established.
2. New garden areas apply at a depth of 10-20cm.
3. To revitalise existing plants (eg. citrus and roses) apply around and under the foliage canopy to the outer edges of the dripline up to 5cm deep. Lightly scratch into the soil surface. Avoid applying around the trunk of plants.
4. Apply mulch over the soil surface after planting to ensure moisture is retained within the soil.

Ongoing plant care

Seasol Super Compost contains liquid compost and added nutrients to improve overall soil health. **Seasol Super Compost** is safe on all plants excluding phosphorous sensitive natives and can be used when required to promote maximum plant growth and health.

Reapply before planting annuals, bulbs, herbs or vegetables for strong root development and healthy growth. If possible, let the soil rest for a couple of weeks before planting to let all the good things go to work.

Check soil moisture weekly (or every couple of days in high heat) for moisture content and water when needed. Depending on plant variety, apply **Seasol** and **PowerFeed** every 2 to 4 weeks for continual healthy, strong growth, beautiful blooms, and tasty edible produce.

Seasol Super Compost is available from Bunnings in a 25 litre bag for every gardener's needs.

Boosted with **Seasol Liquid Compost** to revitalise soil health, improving water and nutrient content

A balanced nutrient and trace element mix to improve soil and plant health for vibrant blooms and tasty edible produce

Rich in organic matter and compost *plus* a wetting agent to improve plant development and ensure water gets to where it's needed

Added gypsum improves compacted soil, breaking up clay soils which allows air and water into the soil

USAGE TIPS

Seasol Super Compost is the perfect partner for any soil project applied whenever it is needed throughout the year.

- ✓ Remove weeds, debris and plants that have died from the area before applying to the soil.
- ✓ Reapply **Seasol Super Compost** in Autumn and Spring to improve worm and microbe activity.
- ✓ Reapply it to the vegie patch every season to replenish nutrient-depleted soils.
- ✓ During summer, regularly check soil moisture and water when needed. Regular deep watering will get the plant's roots to go down into the soil.
- ✓ Apply organic mulch after soil preparation and planting to keep the soil warm in summer and cooler in winter.
