

PRODUCT INFORMATION

Seasol® Power Feed® Plant Food Granules All Purpose

A dynamic granular fertiliser with
added microbes.

Seasol® Power Feed® Plant Food Granules are coated with **Troforte®** beneficial probiotics that work by improving soil structure, helping plants access nutrients in the soil and improving overall plant and soil health.

Seasol® Power Feed® Plant Food Granules are specifically formulated to provide a balanced range of nitrogen (N), phosphorus (P), potassium (K), iron, magnesium, calcium and trace elements to boost growth in all plants including natives.

The granules deliver a balance of slow and quick release nutrients to the plant, promoting vigorous growth whilst stimulating flowering and fruiting throughout the season.

Seasol® Power Feed®
Plant Food Granules are
available in a 1kg tub, 2kg
shaker & 4kg refill bag.

Application Rates

Apply at the beginning of every Spring, Summer, Autumn and Winter to maximise plant health and vigour.

1 tbsp = approx. 15 g of granules.

Plant Type	Pot Size	Application	Frequency
