

## PRODUCT INFORMATION

# Seasol® Power Feed® Plant Food Granules Tomatoes & Veg

A dynamic granular fertiliser specially formulated for tomatoes and vegetables.

**Seasol® Power Feed® Plant Food Granules Tomatoes & Veg** are coated with **Troforte®** beneficial probiotics that work by improving soil structure, helping plants access nutrients in the soil and improving overall plant and soil health.

**Seasol® Power Feed® Plant Food Granules Tomatoes & Veg** are specifically formulated to provide a balanced range of nitrogen (N), phosphorus (P), potassium (K), iron, magnesium, calcium and trace elements to boost growth in all tomato and vegetable crops.

The granules deliver a balance of slow and quick release nutrients to the plant promoting vigorous growth, stimulating abundant yields of tomatoes and vegetables throughout the season.

Seasol® Power Feed® Plant Food Granules are available in a 1kg tub.

## Application Rates

Apply at the beginning of every Spring, Summer, Autumn and Winter to maximise plant health and vigour.

**1 tbsp = approx. 15 g of granules.**

| Plant Type                                                | Pot Size            | Application  | Frequency        |
|-----------------------------------------------------------|---------------------|--------------|------------------|
| Indoor & Outdoor Plants and Seedlings                     | 15cm                | 7.5 g        | Every 8-12 weeks |
|                                                           | 20cm                | 15 g         |                  |
|                                                           | 25cm                | 25 g         |                  |
|                                                           | 30cm                | 30 g         |                  |
| Plant Type                                                | Plant Size          | Application  | Frequency        |
| Flowers, Vegetables, Bulbs and Garden Beds (inc. Natives) | Seedlings           | 50 g per m2  | Every 8-12 weeks |
